### Verse 1

**Em**                                  **B**
Something's going on, just look around
**Em**
Fear is on the rise
           **B**
And there's blood all over the ground
                **Em**
Let's all just blindfold the poor
        **B**
We must remind them what's in store
     **Em**
We got 'em now
                        **B**
Just break them down a little bit more
N.C.
Ah

### Chorus

       **Em**
I said, "Hey, you, feed the machine
**B7**
Bring them all back down to their knees
              **Em**
There's no time to waste, remind the slaves
       **B7**
They ain't gonna make it out alive today"
            **Em**
I said, "Hey, you, poison the well
**B7**
Watch it all burn, take them straight to hell
              **Em**
He's got the whole world in his hands
      **B7**
It was nice to know ya
                 **Em**
We've all been damned c'mon"

### Instrumental

## Verse 2

```
Em                              B
Nothing's going on, no need to fear
          Em
And we're all in this together
      B
And just to make it all clear
          Em
We want the same thing as you
      B
This will all be over soon
Em
Now here's a little pill
              B
Now here's the truth
Em
We're gonna, we're gonna, we're gonna
Em
We're gonna, we're gonna, we're gonna
Em
We're all gonna die!
```
